— Family No. 66. —

— January 1955 —

A few words about this booklet.

First I extend a hearty thank-you to all who helped supply the information needed to set up this 'Family Record'.

Most of you know that Grandfather and Grandmother moved from Indiana to Kansas before their youngest children were born and lived there the remainder of their lives, but it looks like old Indiana has its drawbacks, it drew back more of their decendents than are living any place else although we are scattered almost from coast to coast.

It is almost 4 years since Aunt Barbara suggested that we get up a family record with extra space to write in additional births marriages and deaths, so you will notice that there is some space between most families and extra space between some family groups and 3 blank pages in the back where marriages can be recorded.

The index is set by family names and the individual family records have the husband's name then the wife's, with the direct decendent's name in capital letters.

If you will send me changes and additions as they occur in your family I will try to keep the record up to date and I might even make a printing on gummed paper, if the demand is great enough, this could be cut up and put in the proper places.

Hope you will like the book. — ENOS —
